Total of 32 species and 353 total birds

It was quite windy much of the time when we were out there, so I know that some birds were missed, numbers probably not completely accurate, but we did the best we could with the weather as it was. So, here is the list of all birds that were seen and counted on the property for Sunday September 21st, 2014, this was after about 2 ½ inches of rain.
